

I work for EA Engineering, Science, and Technologies and we are consultants working with the EPA looking to plan a public meeting. I was searching the Yellowstone County website and saw the Interactive Mapping Hub. We are wanting to invite the public and I was wondering if I provided you an area of the city would you be able to send a table or access to a database with parcel information (e.g. mailing addresses) from within that area? Or give me access to the feature layer with this information?

Thank you,

Blake Warner
